

LE ONLY- Ambush Mitigation and Counter-Assault Strategies

Ambush Mitigation and Counter-Assault Strategies is an intensive, reality-based training program designed to enhance officer survivability during deliberate and spontaneous ambush events. Built for patrol officers, supervisors, specialized units, and proactive law-enforcement professionals, this course focuses on immediate-action responses to deadly attacks conducted at close range, from vehicles, during citizen contacts, and in transitional spaces.

Students will develop practical, proven skills in **ambush recognition, pre-attack indicators, reactionary movement, use of cover and concealment, counter-assault principles, communication under stress, solo-officer survival tactics, team response integration, casualty management, and violence-of-action decision-making**. Training emphasizes rapid problem-solving under pressure and the ability to regain initiative during overwhelming circumstances.

This course incorporates scenario-based exercises, force-on-force concepts, tactical movement principles, and practical application drills designed to replicate the realities of contemporary threats faced by law enforcement. Officers will leave with actionable tactics, enhanced confidence, and a survivability mindset rooted in performance under stress.

When seconds decide outcomes, hesitation costs lives. Learn to recognize the threat, get off the X, and win the fight.
